

William Stockton Primary School

Power Maths calculation policy, UPPER KS2

KEY STAGE 2

In upper Key Stage 2, children build on secure foundations in calculation, and develop fluency, accuracy and flexibility in their approach to the four operations. They work with whole numbers and adapt their skills to work with decimals, and they continue to develop their ability to select appropriate, accurate and efficient operations.

Key language: decimal, column methods, exchange, partition, mental method, ten thousand, hundred thousand, million, factor, multiple, prime number, square number, cube number

<p>Addition and subtraction: Children build on their column methods to add and subtract numbers with up to seven digits, and they adapt the methods to calculate efficiently and effectively with decimals, ensuring understanding of place value at every stage.</p> <p>Children compare and contrast methods, and they select mental methods or jottings where appropriate and where these are more likely to be efficient or accurate when compared with formal column methods.</p> <p>Bar models are used to represent the calculations required to solve problems and may indicate where efficient methods can be chosen.</p>	<p>Multiplication and division: Building on their understanding, children develop methods to multiply up to 4-digit numbers by single-digit and 2-digit numbers.</p> <p>Children develop column methods with an understanding of place value, and they continue to use the key skill of unitising to multiply and divide by 10, 100 and 1,000.</p> <p>Written division methods are introduced and adapted for division by single-digit and 2-digit numbers and are understood alongside the area model and place value. In Year 6, children develop a secure understanding of how division is related to fractions.</p> <p>Multiplication and division of decimals are also introduced and refined in Year 6.</p>	<p>Fractions: Children find fractions of amounts, multiply a fraction by a whole number and by another fraction, divide a fraction by a whole number, and add and subtract fractions with different denominators. Children become more confident working with improper fractions and mixed numbers and can calculate with them.</p> <p>Understanding of decimals with up to 3 decimal places is built through place value and as fractions, and children calculate with decimals in the context of measure as well as in pure arithmetic.</p> <p>Children develop an understanding of percentages in relation to hundredths, and they understand how to work with common percentages: 50%, 25%, 10% and 1%.</p>

O	•	Tth	Hth
●●●●●	•	●●●●● ●●	●●●●● ●●●●●

Exchange 1 tenth for 10 hundredths.

O	•	Tth	Hth
●●●●●	•	●●●●● ●	●●●●● ●●●●● ●●●●●

Now subtract the 5 hundredths.

O	•	Tth	Hth
●●●●●	•	●●●●● ●	●●●●● ●●●●● ●●●●● ●●●●●

Now subtract the 2 tenths, then the 2 ones.

O	•	Tth	Hth
●●●●● ●●	•	●●●●● ●	●●●●● ●●●●● ●●●●● ●●●●● ●●●●●

$$\begin{array}{r} \text{O} \cdot \text{Tth} \text{ Hth} \\ 5 \cdot 7 \ 4 \\ - 2 \cdot 2 \ 5 \\ \hline \cdot \end{array}$$

$$\begin{array}{r} \text{O} \cdot \text{Tth} \text{ Hth} \\ 5 \cdot \overset{6}{7} \overset{1}{4} \\ - 2 \cdot 2 \ 5 \\ \hline \cdot \end{array}$$

$$\begin{array}{r} \text{O} \cdot \text{Tth} \text{ Hth} \\ 5 \cdot \overset{6}{7} \overset{1}{4} \\ - 2 \cdot 2 \ 5 \\ \hline \cdot \ 9 \end{array}$$

$$\begin{array}{r} \text{O} \cdot \text{Tth} \text{ Hth} \\ 5 \cdot \overset{6}{7} \overset{1}{4} \\ - 2 \cdot 2 \ 5 \\ \hline 3 \cdot 4 \ 9 \end{array}$$

Year 5 Multiplication

Understanding factors

Use cubes or counters to explore the meaning of 'square numbers'.

25 is a square number because it is made from 5 rows of 5.

Use cubes to explore cube numbers.

Use images to explore examples and non-examples of square numbers.

$8 \times 8 = 64$
 $8^2 = 64$

Understand the pattern of square numbers in the multiplication tables.

Use a multiplication grid to circle each square number. Can children spot a pattern?

	<p>8 is a cube number.</p>	 <p>12 is not a square number, because you cannot multiply a whole number by itself to make 12.</p>													
<p>Multiplying by 10, 100 and 1,000</p>	<p>Use place value equipment to multiply by 10, 100 and 1,000 by unitising.</p> <table border="1" data-bbox="353 619 925 786"> <tr> <td>$4 \times 1 = 4 \text{ ones} = 4$</td> <td></td> </tr> <tr> <td>$4 \times 10 = 4 \text{ tens} = 40$</td> <td></td> </tr> <tr> <td>$4 \times 100 = 4 \text{ hundreds} = 400$</td> <td></td> </tr> </table>	$4 \times 1 = 4 \text{ ones} = 4$		$4 \times 10 = 4 \text{ tens} = 40$		$4 \times 100 = 4 \text{ hundreds} = 400$		<p>Understand the effect of repeated multiplication by 10.</p> 	<p>Understand how exchange relates to the digits when multiplying by 10, 100 and 1,000.</p> <table border="1" data-bbox="1563 659 1944 786"> <tr> <td>H</td> <td>T</td> <td>O</td> </tr> <tr> <td></td> <td>I</td> <td>7</td> </tr> </table> <p> $17 \times 10 = 170$ $17 \times 100 = 17 \times 10 \times 10 = 1,700$ $17 \times 1,000 = 17 \times 10 \times 10 \times 10 = 17,000$ </p>	H	T	O		I	7
$4 \times 1 = 4 \text{ ones} = 4$															
$4 \times 10 = 4 \text{ tens} = 40$															
$4 \times 100 = 4 \text{ hundreds} = 400$															
H	T	O													
	I	7													
<p>Multiplying by multiples of 10, 100 and 1,000</p>	<p>Use place value equipment to explore multiplying by unitising.</p>  <p> <i>5 groups of 3 ones is 15 ones.</i> <i>5 groups of 3 tens is 15 tens.</i> </p>	<p>Use place value equipment to represent how to multiply by multiples of 10, 100 and 1,000.</p>  <p> $4 \times 3 = 12$ $4 \times 300 = 1,200$ </p> <p> $6 \times 4 = 24$ $6 \times 400 = 2,400$ </p>	<p>Use known facts and unitising to multiply.</p> <p> $5 \times 4 = 20$ $5 \times 40 = 200$ $5 \times 400 = 2,000$ $5 \times 4,000 = 20,000$ </p> <p> $5,000 \times 4 = 20,000$ </p>												

	<p>So, I know that 5 groups of 3 thousands would be 15 thousands.</p>

Using knowledge of factors and partitions to compare methods for multiplications

Use equipment to understand square numbers and cube numbers.

$$5 \times 5 = 5^2 = 25$$

$$5 \times 5 \times 5 = 5^3 = 25 \times 5 = 125$$

Compare methods visually using an area model. Understand that multiple approaches will produce the same answer if completed accurately.

Represent and compare methods using a bar model.

Use a known fact to generate families of related facts.

Use factors to calculate efficiently.

$$15 \times 16$$

$$= 3 \times 5 \times 2 \times 8$$

$$= 3 \times 8 \times 2 \times 5$$

$$= 24 \times 10$$

$$= 240$$

Multiplying by 10, 100 and 1,000

Use place value equipment to explore exchange in decimal multiplication.

Understand how the exchange affects decimal numbers on a place value grid.

Use knowledge of multiplying by 10, 100 and 1,000 to multiply by multiples of 10, 100 and 1,000.

$$8 \times 100 = 800$$

$$8 \times 300 = 800 \times 3$$

	<p>Represent 0.3.</p> <p>Multiply by 10.</p> <p>Exchange each group of ten tenths.</p> <p>$0.3 \times 10 = ?$ 0.3 is 3 tenths. 10×3 tenths are 30 tenths. 30 tenths are equivalent to 3 ones.</p>	<p>$0.3 \times 10 = 3$</p>	<p>$= 2,400$</p> <p>$2.5 \times 10 = 25$ $2.5 \times 20 = 2.5 \times 10 \times 2$ $= 50$</p>
<p>Multiplying decimals</p>	<p>Explore decimal multiplications using place value equipment and in the context of measures.</p> <p>3 groups of 4 tenths is 12 tenths. 4 groups of 3 tenths is 12 tenths.</p> <p>$4 \times 1 \text{ cm} = 4 \text{ cm}$ $4 \times 0.3 \text{ cm} = 1.2 \text{ cm}$ $4 \times 1.3 = 4 + 1.2 = 5.2 \text{ cm}$</p>	<p>Represent calculations on a place value grid.</p> <p>$3 \times 3 = 9$ $3 \times 0.3 = 0.9$</p> <p>Understand the link between multiplying decimals and repeated addition.</p>	<p>Use known facts to multiply decimals.</p> <p>$4 \times 3 = 12$ $4 \times 0.3 = 1.2$ $4 \times 0.03 = 0.12$</p> <p>$20 \times 5 = 100$ $20 \times 0.5 = 10$ $20 \times 0.05 = 1$</p> <p>Find families of facts from a known multiplication.</p> <p><i>I know that $18 \times 4 = 72$.</i></p> <p><i>This can help me work out:</i></p> <p>$1.8 \times 4 = ?$ $18 \times 0.4 = ?$ $180 \times 0.4 = ?$ $18 \times 0.04 = ?$</p>

Use a place value grid to understand the effects of multiplying decimals.

Year 6 Division

Understanding factors

Use equipment to explore different factors of a number.

$24 \div 4 = 6$

$30 \div 4 = 7 \text{ remainder } 2$

4 is a factor of 24 but is not a factor of 30.

Recognise prime numbers as numbers having exactly two factors. Understand the link with division and remainders.

$17 \div 2 = 8 \text{ r } 1$

$17 \div 3 = 5 \text{ r } 2$

$17 \div 4 = 4 \text{ r } 1$

$17 \div 5 = 3 \text{ r } 2$

Recognise and know primes up to 100. Understand that 2 is the only even prime, and that 1 is not a prime number.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50

Dividing by a 2-digit number using long division

Use equipment to build numbers from groups.

*182 divided into groups of 13.
There are 14 groups.*

Use an area model alongside written division to model the process.

$377 \div 13 = 29$

Use long division where factors are not useful (for example, when dividing by a 2-digit prime number). Write the required multiples to support the division process.

$377 \div 13 = ?$

$377 \div 13 = 29$

A slightly different layout may be used, with the division completed above rather than at the side.

			$\begin{array}{r} 3 \\ 21 \overline{) 798} \\ - 630 \\ \hline 168 \end{array}$ $\begin{array}{r} 38 \\ 21 \overline{) 798} \\ - 630 \\ \hline 168 \\ - 168 \\ \hline 0 \end{array}$ <p>Divisions with a remainder explored in problem-solving contexts.</p>
<p>Dividing by 10, 100 and 1,000</p>	<p>Use place value equipment to explore division as exchange.</p>  <p>Exchange each 0.1 for ten 0.01s. Divide 20 counters by 10.</p> <p><i>0.2 is 2 tenths. 2 tenths is equivalent to 20 hundredths. 20 hundredths divided by 10 is 2 hundredths.</i></p>	<p>Represent division to show the relationship with multiplication. Understand the effect of dividing by 10, 100 and 1,000 on the digits on a place value grid.</p>  <p>Understand how to divide using division by 10, 100 and 1,000.</p> <p>$12 \div 20 = ?$</p>  <p>$12 \div 10 = 1.2$ $1.2 \div 2 = 0.6$</p>	<p>Use knowledge of factors to divide by multiples of 10, 100 and 1,000.</p> <p>$40 \div 50 = \square$</p> <p>$40 \rightarrow \boxed{\div 10} \rightarrow \boxed{\div 5} \rightarrow ?$</p> <p>$40 \rightarrow \boxed{\div 5} \rightarrow \boxed{\div 10} \rightarrow ?$</p> <p>$40 \div 5 = 8$ $8 \div 10 = 0.8$</p> <p>So, $40 \div 50 = 0.8$</p>
<p>Dividing decimals</p>	<p>Use place value equipment to explore division of decimals.</p>	<p>Use a bar model to represent divisions.</p>	<p>Use short division to divide decimals with up to 2 decimal places.</p>

8 tenths divided into 4 groups. 2 tenths in each group.

0.8			
?	?	?	?

$$4 \times 2 = 8$$

$$8 \div 4 = 2$$

So, $4 \times 0.2 = 0.8$

$$0.8 \div 4 = 0.2$$

$$\begin{array}{r} . \\ 8 \overline{) 4 \cdot 2 \ 4} \end{array}$$

$$\begin{array}{r} 0 \cdot \\ 8 \overline{) 4 \cdot 2 \ 4} \end{array}$$

$$\begin{array}{r} 0 \cdot 5 \\ 8 \overline{) 4 \cdot 2 \ 4} \end{array}$$

$$\begin{array}{r} 0 \cdot 5 \ 3 \\ 8 \overline{) 4 \cdot 2 \ 4} \end{array}$$
