

CLASSROOM DOORS OPEN AT 8:50 AND CLOSE AT 9.

IT'S IMPORTANT ALL CHILDREN ARE IN ON TIME TO LEARN

### Learning Focus

What an exciting time it is in our classrooms as we explore the wonderful world of Geography! Our **Nursery** children are getting into the Spring spirit by observing the weather and different environments, all while enjoying the fabulous play equipment at school.

In **Reception**, the budding geographers are busy drawing maps of our local area and using aerial photographs to sharpen their observational skills. **Year 1** is diving into the UK, learning about our capital cities and what makes each one unique. Meanwhile, **Year 2** is reflecting on the beauty of our locality, linking their studies to their upcoming trip to Burwardsley, where they'll compare countryside and town life.

Over in **Years 3/4**, the children are on a river adventure, exploring how rivers are formed, with a recent field trip to the River Mersey at Eastham to gather first-hand experience. Lastly, our **Year 5/6** students are examining energy sources, discussing the differences between renewable and non-renewable energy. During their recent residential, the Year 6s spotted various forms of renewable energy, while the Year 5s had a chance to admire a wind farm on their trip. How many forms of renewable energy can you name?

It's been another fantastic week filled with exciting trips that have truly enriched our children's personal development! We've had the pleasure of visiting Daresbury Science Laboratory, exploring the beauty of Eastham Woods, and diving into the world of books at our local library. Each outing has beautifully complemented our curriculum, providing hands-on experiences that spark curiosity and learning.

The children have been remarkable, working together in various activities and building wonderful relationships along the way. It's heartening to see them debate issues and learn the art of compromise on different topics. These experiences are invaluable, and we can't wait for the adventures that lie ahead!

Thank you to 2LMc who delivered a wonderful assembly this morning. It's lovely to hear the children talk so eleguently in front of an audience

Nature Smart	Adhara S - 2D
Music Smart	Maisie F - Nursery
Word Smart	George McG - RG
Smart Learner	Tommy W 5/6C

### Ready Respectful Safe

#### Parental Questionnaire

Following the parental questionnaire, some parents would like to know more about why their child has been awarded a rosette. Therefore, after Easter, children will be bringing a certificate home as well to explain the reason they have been given the rosette.
